ABOUT ME

An agile Front-End Developer & Software Engineering student experienced in launching user-centric web applications and scaling platforms to 700+ users. Strong foundation in JavaScript ecosystems and technical leadership, eager to leverage skills in an impactful software development internship.

EDUCATION

AI & Software Engineering 2024 - Present

Faculty of Engineering, Tanta University.

TECHNICAL SKILLS

- Languages & Frameworks:
 - Python, JavaScript, React.js, HTML5, CSS3, Sass, Bootstrap, PHP
- Backend & Databases: Firebase (Auth & Cloud Firestore), MySQL, LocalStorage Caching
- Tools & Methodologies: Git, GitHub, Notion, UI/UX Design, Responsive Web Design

PROFESSIONAL & LEADERSHIP EXPERIENCE

- **Coding Instructor | iSchool** **June - 2026**
 - Delivered in-person coding sessions for over 120 young learners within a tech initiative.
 - Simplified programming fundamentals and logic into engaging, age-appropriate lessons.
 - Managed physical classroom dynamics effectively to maintain high engagement and focus.
 - Guided children through hands-on activities to build basic problem-solving skills.
- **Professional Programming Instructor — Self-Employed | 2022 – PRESENT**
 - Delivered programming courses for youth and children covering HTML, CSS, Sass, Bootstrap, JavaScript, C++, Python, Vue.js & React.js.
 - Trained students in-person and online with a focus on real-world application.

- **Course Instructor — Ministry of Education | Aug 2023 – 2024**
 - Delivered intensive offline technical training tracks (HTML5, CSS3, C++ Basics) under a governmental educational initiative.
 - **AI & Programming Instructor — Genial Math | Jan 2026**
 - Simplified Artificial Intelligence/Machine Learning concepts and core programming tracks through hands-on projects.
-

PROJECTS

- **Mohasabat Al-Nafs (Islamic Habit Tracker) — Full-Stack Web App**
 - Engineered a high-performance daily habit tracker using Vanilla JS and CSS3 for maximum loading speed.
 - Integrated secure Google Auth and Cloud Firestore for seamless real-time data sync across devices.
 - Launched V2 with dynamic scoring algorithms, Geolocation-based prayer APIs, and browser notifications.
 - Successfully gathered user feedback, scaling the platform to over 700+ active users within days of launch.
 - Link: <https://mohasabat-alnafs.vercel.app>
- **LETA3LAM — Programming Education Platform (LMS)**
 - Architected the frontend and database structure of an online LMS tailored for youth education.
 - Built a secure role-based access system enabling personalized dashboards for students and instructors.
 - Implemented dynamic course tracking, embedded video lectures, and an interactive blog ecosystem.
 - Tech Stack: HTML5, CSS3, JavaScript, Bootstrap, PHP, MySQL.
 - Link: <https://leta3lam.vercel.app>
- **Personal Portfolio Website**
 - Deployed a lightweight, fully responsive portfolio web app to showcase technical projects and live demos.
 - Optimized rendering speeds across all viewports using CSS variables for efficient theme switching.
 - Link: <https://mohamad-hamdi.github.io>
- **Ma3an Family Rules — Frontend Web App**
 - Voluntarily Designed and deployed the responsive web platform to digitize the organization's internal regulations.
